Saint-Gobain Ecophon develops, manufactures and markets acoustic products and systems that contribute to a good working environment by enhancing peoples' wellbeing and performance. Our promise »A sound effect on people« is the core backbone of everything we do.

Solo™ Kit

All in one and ready to go

Why buy Solo™ Kit?

Good for low volume projects

- Only 2 panels per kit

Reduce waste

- Exact amount of components needed for the installation for ease to the installer

Need to know

In one Solo™ Kit carton there will be: 1 template, 2 Solo panels and 8 or 12 anchors & wires depending, on Solo Square or Solo Rectangle purchased.

Available sizes

- G35842050 – Solo Square Kit - 1200 x 1200 mm
- G35842068 – Solo Rectangle Kit - 1800 x 1200 mm
- G35842051 – Solo Rectangle Kit - 2400 x 1200 mm

Two of the world's most recognised ceiling manufacturers have combined strengths to offer the **best of both** in **one market-leading brand**.

KNAUFCEILING
Solutions

With a new harmonised product portfolio, **Knauf Ceiling Solutions** can offer customers greater diversity and endless possibilities. An innovator in sustainable design and functionality, our solutions enable architects, planners, distributors and contractors to experience more choice, more inspiration and more support.

We are multi-material providers and underline this by dividing our harmonised portfolio of proven product brands into four categories: Mineral Solutions, Metal Solutions, Wood & Wood Wool Solutions and System Solutions.

From sustainable mineral solutions, to durable metal and acoustically optimised wood and wood wool solutions, our shapes, textures and colours inspire sustainable design solutions that turn interior spaces into amazing experiences.

By embodying the best of our long-standing experience and our proven product brands, **THERMATEX, ECOMIN, HERADESIGN, VENTATEC, DONN, ARMSTRONG METAL** and the new **ADAGIO**, **Knauf Ceiling Solutions** is setting the standard for safety, comfort, efficiency and performance. With a boundless multi-material approach that enables you to experience more choice, more inspiration and more support, to help find the unique solution you're looking for.

Two of the world's most recognised ceiling manufacturers have combined strengths to offer the **best of both** in **one market-leading brand**.

The sustainability of our brand is emphasized by certifications, energy-efficient production and zero-waste processes. We have the utmost responsibility for the environment, as well as for our actions towards the wellbeing of customers and employees. By embodying the best of two worlds and building on our long-standing experience, **Knauf Ceiling Solutions** is setting the standard for safety, comfort, efficiency and performance.

HEALTHY INTERIORS CHALLENGE

The World Health Organization reports that 30% of new and renovated buildings receive excessive complaints related to indoor air quality. In addition, poor air quality, and elevated temperatures consistently lowered employee performance by up to 10%.

SOLUTION

Knauf Ceiling Solutions:

- achieve low or very low VOC and formaldehyde emission levels.
- have all been classified E1 for formaldehyde (best test result possible).
- for a large majority, achieve A+ (the best performance level under the stringent French VOC labelling system).

VISUAL COMFORT CHALLENGE

The light reflectance of the ceiling, floor and wall surfaces play the second most important role for overall illumination of the room, directly affecting working comfort, wellbeing and productivity.

SOLUTION

Specifying high light reflectance ceilings, with up to 87% of the light reflected back into the space, contribute to LEED®, BREEAM, HQE, DGNB and Well Building Standard credits. A well-design ceiling with high light reflectance:

- Improves space illumination, allowing for fewer light fixtures
- Reduces electrical light output and lowers maintenance costs
- Reduces cooling load

SUSTAINABILITY

Positive impact on people and the planet

Discover our sustainability story and the positive contribution you make to people and the planet when you choose our acoustic ceiling and wall solutions.

Our core material is natural volcanic stone – one of nature's most abundant resources. When we create our products, we ensure that they have high recycled content, they are long lasting and they can be fully recyclable. They support the closed-loop circular economy and are certified to leave a positive impact on people and the planet.

Doing our part for the Circular economy

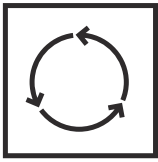

Cradle to Cradle Certified® ?

Rockfon products are Cradle to Cradle Certified to both Bronze and Silver level. This is internationally recognized as a safer, more sustainable product that supports the circular economy.

90% Of our products are
Cradle to Cradle Certified.

Keeping our operational footprint small

The ROCKWOOL Group has a very ambitious decarbonisation strategy which is tied to the Science Based Targets initiative in the transition to a net-zero economy. We will do this by improving the energy efficiency in our factories, investing in technology innovation and using the natural circularity of stone wool.

The carbon footprint (kg of CO₂ eq.) of our products can be found in our Rockfon Environmental Product Declarations, based on cradle to gate and cradle to cradle criteria.

Contribution to Building Rating schemes

BREEAM[®]
delivered by bre

There are a growing proportion of projects which aim to adopt voluntary sustainable rating schemes. Rockfon's products make a significant contribution to the following Building Rating schemes.

Rockfon products provide major credits under five of BREEAM's environmental areas and four of LEED's relating to air quality, lighting comfort, sound comfort and innovation.

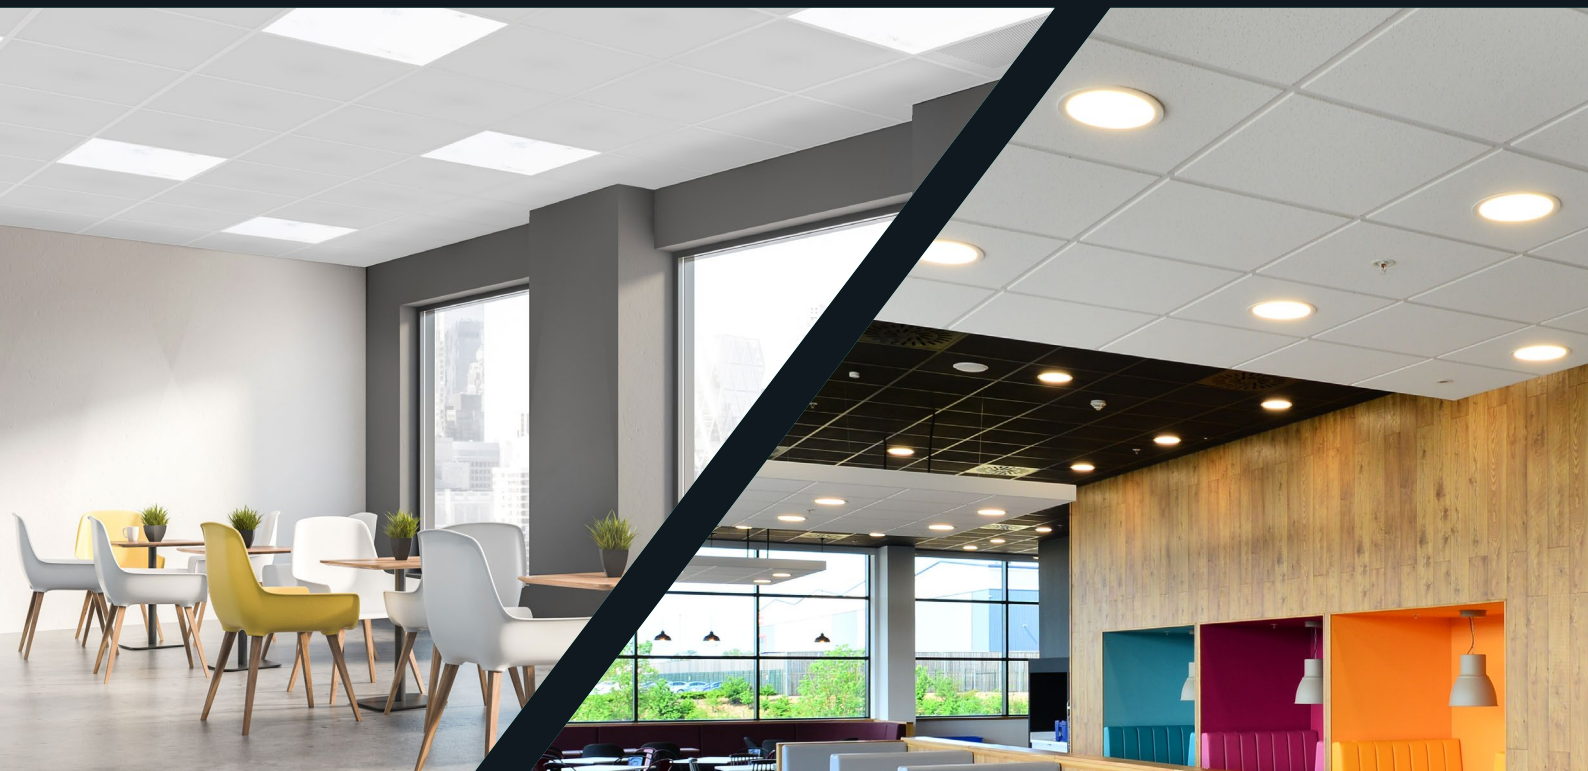

For the WELL rating scheme, Rockfon ceiling products contribute to 8 out of the 10 WELL concepts. This includes under the Materials Concept, where the overall aim is to reduce human exposure to chemicals that may impact health during the construction, remodelling, furnishing and operation of buildings. And as Rockfon products are highly sound absorbent, WELL has awarded a point for providing a good acoustic environment.

Product Sustainability Declarations

Visit rockton.co.uk/sustainability to download Product Sustainability Declarations for each of our products which includes everything you need to know about the products' contribution to the major building rating schemes, the available environmental labels, certificates and so much more.

Sounds Beautiful

About Zentia

Zentia is the UK's market leading manufacturer of complete ceiling solutions. We make a wide range of mineral ceiling tiles, suspension grids, and floating ceiling systems at our two factories in Gateshead, Tyne and Wear. Evolved from Armstrong Ceiling Solutions and with over 100 years of knowledge and experience, Zentia is the UK's only major ceiling manufacturer, offering a shorter supply chain to the construction industry in the UK and Ireland, and providing specifiers and ceiling contractors with reliable products they can trust.

[zentia.com](https://www.zentia.com)

Reliability

Products you can rely on

Zentia is with you at every stage of your project, from manufacturing and specification to installation and maintenance. So as well as delivering exceptional quality, with a near-zero returns record, we provide total reliability.

UK Focus

The UK market is the centre of our world

We're making a substantial investment in local manufacturing sites and based our head office and sales teams right here in the UK. Which means there are no supply chain or global distribution concerns for you to worry about. So just as you could before we evolved from Armstrong Ceiling Solutions, you can rely on Zentia whatever the challenge, whatever the deadline.

Innovation

Forward thinking

At Zentia, we're adapting to an ever-changing world. With a new range of products in the pipeline, we're making bold decisions and acting fast for our customers, delivering smart and innovative solutions to challenges old and new.

Partnership

Service you can trust

At Zentia, we believe the best relationships are built on trust. We're continuing to reinforce partnerships with the largest distributors and strengthening our specialist contractor scheme in both the UK & Ireland. With our dedicated support teams and our installation school, we're training the next generation of ceiling contractors and fitters. All solid foundations for a mutually brighter future.

What makes Zentia pioneers in the evolution of ceiling solutions?

At Zentia, we're adapting to an ever-changing world. We're making bold decisions, acting fast for our customers, delivering smart and innovative solutions to challenges old and new. A range of new products have been launched so far under Zentia, such as Aquabloc, Canopies, Baffles and Wall Absorbers. More new products are in the pipeline for 2022 and beyond, which will give specifiers and architects further design flexibility on projects, while providing distributors with an ever-expanding range of ceiling and wall solutions to offer their customers.

We use recycled materials throughout our process. We offer exclusive access to Zentia's off-cut recycling scheme for our Pinnacle Partners. We are also reducing the use of natural resources in our production facilities. Our manufacturing facility runs on 100% renewable electricity and uses a rainwater tank, reducing the amount of mains water we use in the production process.

At the end of 2021, we introduced dust extractors in our plant to create a more comfortable and clean working environment. This system also captures raw materials and puts them back into the manufacturing process, minimising waste. Another recent innovation in our manufacturing process is our paint system; by installing barriers to catch overspray and filter it back into paint systems, reducing 50% in paint wastage.

The excitement is building behind the scenes as our Zentia team grows to accommodate our robust plans. As we aim to make 2023 our most innovative year to date, working with clients and industry experts, we will be introducing exciting new products with innovative digital plans, including a user-friendly product solution finder. We are proud to be taking responsibility for today and building for tomorrow.
